Table 1: Attributes for geopackage files.

Attribute	Snapshot	Final	Ignition	Type	Description
fireid	x	x	x	integer	Original ID of fire before merging
mergid	x	x	x	integer	Fire ID after merging
ftype	x			string	Land cover of the most recent fire locations
isactive	x			Bool	1: indicator of fire that is actively growing (new fire pixels detected)
t_inactive	x			integer	Days since last active fire detection associated with fire
isignition	x			bool	1: perimeter is new ignition location 0: expanding an existing fire
invalid	x			bool	1: indicator of fire that is not valid
n_pixels	x	x	x	integer	Number of total fire pixels
n_newpixels	x			integer	Number of fire pixels at current time step
farea	x	x	x	float	Fire size at current time step (km^2)
fperim	x	x	x	float	Fire perimeter length (km)
flinelen	x			float	Length of active fire line (km)
duration	x	x		float	Fire duration (days)
pixden	x			float	Pixel density
meanFRP	x			float	Average area-normalised FRP at current time step (W/m^2)
FRP95	x			float	95th percentile of FRP at current time step (W/m^2)
tst_year	x	x	x	integer	Start year of fire
tst_month	x	x	x	integer	Start month of fire
tst_day	x	x	x	integer	Start day of fire
tst_ampm	x	x	x	string	Start AM/PM
ted_year	x	x		integer	End (most recent) year of fire
ted_month	x	x		integer	End (most recent) month of fire
ted_day	x	x		integer	End (most recent) day of fire
ted_ampm	x	x		string	End (most recent) AM/PM
ted_doy	x			integer	End (most recent) Julian day
lake_area	x			float	total area in perimeter covered by surface water (km^2)
lake_no	x			integer	number of surface water features in perimeter
lake_border	x			float	outer perimeter that borders surface water (km)
lake_border_tot	x			float	all parts of perimeter that border surface water (km)
avg_spread	x			float	average distance between new fire pixels at active fire line and previous perimeters (m)
spread_95	x			float	95th percentile of distance between new fire pixels at active fire line and previous perimeters (m)
mergedate	x			datetime	date of most recent merging
lcc_final		x		string	dominant land cover type of final perimeter

Table 2: Attributes for NFP.txt files

Attribute	Type	Description
fireid	integer	Original ID of fire before merging
mergid	integer	Fire ID after merging
x	float	x coordinate in EPSG 3571
y	float	y coordinate in EPSG 3571
DS	float	pixel size in along-scan dimension [km]
DT	float	pixel size in along-track dimension [km]
frp	float	area-normalised fire radiative power
sat	float	satellite (SNPP)
datetime_utc	datetime	UTC date and time of detection
